MSN Student Learning Outcomes

1. Demonstrate critical thinking and innovation in decision-making and problem solving.
2. Integrate the use of theoretical frameworks for Transcultural nursing and management practices.
3. Synthesize advanced learning from the nursing, behavioral, social and communication sciences into Transcultural nursing management practice.
4. Employ research methods in nursing and management processes.

5. Devise collegial strategies with all levels of health care providers to achieve a collaborative network.
6. Serve as recruiters, role models and mentors to RNs to develop their expertise in clinical nursing administration and leadership.
7. Model behavioral characteristics of client advocacy and ethical perspectives.
8. Execute a leadership style that manifests responsibility and accountability for the quality of nursing care to clients representing a full scope of ethnic, social, economic and health state diversity.
9. Demonstrate application of the use of management information systems.
10. Model a commitment to continuous personal and professional development.
